COVID-19 DAILY SCREENING PROCEDURES
FOR STUDENTS, EMPLOYEES AND VISITORS

All employees, students and visitors will be responsible for self-screening before attending school each day. We have a tool that will make this process easy for you and we are requesting that you use the tool. This will allow us to keep screening documentation.

Student Screening – Families download the app and create a parent account. The parents adds in their student's information as a "dependent" in the app. Before dropping a student off or putting a student on the bus, the parent is able to check in a student on the app and certify they are symptom-free and do not have a history of exposure. Families who do not have a phone? We can send out a unique link to allow families to check in students on the computer or any device without downloading the app.
